
**Baby's 1st Project Community Action Network (CAN) and
Public Citizens for Children & Youth (PCCY) present a
Call to Action on Lead Poisoning Prevention!**

**Tuesday, March 12, 2019
9 – 11 am**

2602 W. 9th Street, Third Floor, Chester PA 19013
(the MOB at the old Community Hospital Building)

Lead-based paint in children's homes is the number one source of poisoning. With over 300 children poisoned in Delaware County each year and nearly two out of three homes built before lead-based paint was banned, more efforts must and can be undertaken to protect our youngest residents.

Join us for a program on strategies to prevent poisoning, the launch of a new coalition and an expert panel on health care and housing remediation resources for lead poisoned babies. A light breakfast will be provided.
